

OASA Chapters (at secondary schools or at universities)

OASA is committed to fostering innovation and expertise through dedicated communities. We proudly introduce OASA Chapters for secondary schools and universities -- a professional development program designed to empower budding entrepreneurs and space enthusiasts within the academic environment while encouraging joint business development with start-ups and established firms in the NewSpace industry.

Empowering the Next Generation

OASA stands at the forefront of cultivating the next generation of “astropreneurs” – individuals equipped with the vision and skills to create and thrive in the growing NewSpace economy. Our mission revolves around nurturing an environment that encourages cooperation, action research, innovation, and transcending geographical boundaries while nurturing a deep passion for entrepreneurship and space science.

The Essence of OASA Chapters

OASA Chapters embody this mission within educational institutions – beginning in the international global hub of Hong Kong and eventually spreading throughout key cities around the world. These chapters serve as focal points for preparing students to tackle the challenges and seize the opportunities that the NewSpace era is presenting. By becoming a part of an OASA Chapter, students leverage on the reach and experience of OASA and its global partners.

- **Internship Opportunities:** Collaborate and join as interns with industry pioneers, scientists, and leaders, gaining critical experience and forming connections within the space sector.
- **Mentorship Programs:** Connect with seasoned professionals, acquiring insights and guidance that contribute to students’ personal and professional growth. OASA has a wide and deep collection of retired professionals and entrepreneurs.
- **Networking Events:** Engage with peers, fellow entrepreneurs, and experts in space-related fields, broadening students’ horizons and network through its own chapter events or join OASA’s monthly events for free or at deep discount.
- **Practical Action Learning:** Participate in workshops, discussions, educational tours like launch events and hands-on real-life projects that would open the minds of students and expose them to practical skills in command, control, and communication.
- **Leadership Development:** Learn and gain experience in running a small cabinet and sustainable chapter.
- **Space Thematic Discussions:** Join scientists, space enthusiast, astronomers, space lawyers, and investors in monthly SpaceBiz Dialogues, local space seminars and conferences, World Space week, and development on SDG-17.

Navigating the OASA Chapter Experience

Establishing an OASA Chapter is an educational journey. Students collaborate with OASA to establish and operate these chapters, guided by mentors and equipped with a plethora of resources. Through purposeful events, dialogues, and initiatives, students shape the growth of their chapters and engage with real-world challenges.

Why Choose to build and sustain an OASA Chapter?

- **For Peace and Cooperation:** Because we have only one earth and this is our home. Learning to live and work together, sharing resources on earth and in space.
- **For Contributing to the NewSpace Ecosystem:** Get involved. Get going. Just launch it! And help make your local city as an eventual space hub.
- **For that Global and Space Consciousness:** Work on fun projects with others outside Hong Kong and expand students' international and spatial perspective.
- **To Be at the Forefront of Innovation and Technological Adoption:** Every OASA has done, has been innovative, new, and different.
- **For Humanity:** Contributing and helping others to resolving climate change and helping others to see and learn to mitigate the next one (space debris for example).

Join the OASA Chapter Community

Are your students prepared to venture beyond traditional learning and engage with a community focused on fostering professional growth? Embrace the opportunity and become a part of an OASA Chapter – a journey that primes you for success in the NewSpace frontier.

Elevate your potential with OASA Chapters – bridging education and opportunity in the realm of NewSpace! Be Space Ready!
